## D3 Skis

**HELIX H2**

Improved from the ground up the HELIX H2's new re-sculpted bevels and flex pattern deliver performance all slalom skiers will appreciate. Like the Quest 45, the new H2 features D3 *Quadaxial Technology* which limits twist in the tail and enhances twist in the fore-body thus improving edge hold and resulting in an earlier line to the next buoy. More stable, more predictable, more precise, more of why the world's best skiers choose D3. Ride a D3 and experience first-hand what better performance feels like. Demo the new Helix H2 or the world record holding Quest 45 at the finest pro shops and ski schools or visit [d3skis.com](http://d3skis.com) to take advantage of our factory direct demo program.
